

Product name

CH340C WIFI Module Adapter Download Debug for ESP8266 ESP-01/01S

Description

This is a downloader which adopts CH340G USB to Serial Chip and adds 8 self help download circuits, which is very convenient for users to download programs to ESP-01/01S wifi module, upgrade firmware, serial port AT command debugging, etc.

This module supports Arduino IDE, Anxin ESP8266 Flasher, and music One-Click download of software such as Xin Flash Download.

Features

- No need to press any button
- The wifi module will automatically enter into download mode.
- Low cost and low price solution for rapid prototyping.
- Compact size, easy to embed in any product

Specifications

- Compatible With ESP8266 ESP-01/01S
- Operating Voltage 5 VDC
- USB to Serial Chip CH340C
- Length (mm) 50
- Width (mm) 14
- Height (mm) 12
- Weight (gm) 6

Package Include

- 1x CH340C WIFI Module Adapter Download Debug for ESP8266 ESP-01/01S
