

الحمادي للإلكترونيات
ALHAMMADI FOR ELECTRONICS

The product is equipped with a self-resettable fuse,

If the current is too large, it will automatically

disconnect, and the fuse will automatically recover after

cooling.

It's very practical!

Special Reminder:

DC motor governor connected to DC
power supply,

Do not directly connect to household
220V AC power,

Otherwise, you will be responsible
for the damage!

This is a 2A high-current governor, continuous current greater than 0.5A, 775 motor, children's car motor is not moving, don't buy wrong. It is not recommended to supply more than 12V, such as 12V lead-acid batteries, which may cause damage to the governor

适用1.8V-15V电压范围内适用

带开关功能

适用范围电流2A内

重量14g
