

**Product Name:**TDA7492 50W+50W Wireless Bluetooth 4.0  
Receiver Digital Audio Amplifier Board TDA7492P

**Product Description:**

- 1.Small size, Easy to use.
- 2.Chip:TDA7492P.
- 3.Power: 2.1 interface 8-25V DC power supply.
- 4.Audio input: CSR8635 Bluetooth chip, Bluetooth V4.0(stereo input various versions of the bluetooth connection).
- 5.Output Power: Add pre-5532 output foot (powered 25V,6  $\omega$  impedance output 2x50W, 8  $\omega$  impedance output 2x40W dualchannel).
- 6.Output Impedance: 8  $\omega$  (Best), 4/6/8/16  $\omega$  impedance can drive speakers.
- 7.DIP switches can be adjusted directly after the amp gain more respect and better promote greater damping horn.
