

الحمادي للألكترونيات
ALHAMMADI FOR ELECTRONICS

Ultra-small volume, physical comparison drawing

Product Features and Uses:

1. This module uses high-performance imported chips, and its performance is better than that of general modules.
2. Input 0.9V~5V any DC voltage, can stably output 5V DC voltage, with a single AA battery power supply can output up to 200~300MA current, two AA batteries can output 500~600MA current, can be your mobile phone (iphone can not be temporary), camera, single-chip microcomputer and digital products power

3. Industrial-grade temperature range : prefix = st1 ns =

"urn:schemas-microsoft-com:office:smarttags"-40°C---+85°C

4. High conversion efficiency, up to 96%

5. With USB receptacle, it is widely used

6. Ultra-small size (PCB board 25mm*18mm), used to install in various small equipment

7. With working indicator
